

# Latin Conjugations

for Verbs in Wheelock's Vocabulary

© University of Oregon

Dept. of Classics

August 2020

# About these pages:

This is a first attempt at a 201 Latin Verbs type of book, containing all the verbs in Wheelock's main vocab.

The main idea here is to show real Latin forms. This means that if a form is not found in extant Latin and could not reasonably be expected to be used, it is not shown here. This means, for instance, that many passive forms are not listed for intransitive verbs (verbs which do not normally take direct object in the active voice). A common exception to this is the use of the 3rd singular form for impersonal passives (e.g. *itum est* or *itur*, "people went/go"). Even so, such forms are generally not listed here if they are not found in extant Latin.

This is a first version, so errors will be found.

# abeō abīre abī abitum
